❖CONTENTS❖

1. FINITE ELEMENT TECHNIQUES AND STUDIES

- 1.1 A FINITE ELEMENT MODEL FOR STRAND CABLES, A. Nawrocki and M. Labrosse, Laboratory of Mechanics and Materials, Ecole Centrale de Nantes, Nantes, France1
- 1.2 A NOVEL FORMULATION OF INFINITE ELEMENTS, T.T. Abdel-Fattah*, H.A. Hodnod# and A.Y. Akl#, *Building Research Centre, Giza, Egypt, #Faculty of Engineering, Cairo University, Giza, Egypt..... 13
- 1.3 CHARACTERIZATION OF GROUND SUBSIDENCE OF ABANDONED MINES, Y. Najjar*, M. Zaman#, J.L. Ahern# and J.G. Laguros#, *Kansas State University, Manhattan, United States of America, #University of Oklahoma, Norman, United States of America 23

2. ANALYSIS OF PLATES

- 2.1 A SIXTH ORDER ACCURACY NINE-POINT SCHEME FOR THE BIHARMONIC EQUATION AND ITS APPLICATION TO THE DEFLECTION OF LOADED PLATES, M. Arad, A. Yakhot and G. Ben-Dor, Department of Mechanical Engineering, Ben-Gurion University of the Negev, Beersheva, Israel..... 31
- 2.2 HIGH ORDER COST EFFECTIVE MODELING OF PLATES ON ELASTIC FOUNDATION, M. Arad, A. Yakhot and G. Ben-Dor, Department of Mechanical Engineering, Ben-Gurion University of the Negev, Beersheva, Israel..... 39

3. COMPUTATIONAL TECHNIQUES

- 3.1 GRAPH THEORETICAL METHODS FOR PROFILE REDUCTION, A. Kaveh and G.R. Roosta, Iran University of Science and Technology, Tehran, Iran 43

4. NON-LINEAR ANALYSIS

- 4.1 STATIC AND DYNAMIC ANALYSIS OF FLEXIBLE STRUCTURES WITH SNAP-THROUGH BEHAVIOUR, M.A. Millar and M. Barghian, Department of Civil and Structural Engineering, UMIST, Manchester, United Kingdom..... 51
- 4.2 POST-BUCKLING OF PORTAL FRAMES - REDUCED NUMBER OF DOF MODELS, P. Providencia E. Costa, Department of Civil Engineering, University of Coimbra, Coimbra, Portugal..... 59

5. MATERIAL MODELLING

- 5.1 INFLUENCE OF VARIOUS HYPOTHESES ON THE FATIGUE LIFE EVALUATION OF A CRACKED ROUND BAR, N. Couroneau and J. Royer, Laboratory of Mechanics and Materials, Ecole Centrale de Nantes, Nantes, France 65
- 5.2 NUMERICAL EXPERIMENTS TO DETERMINE THE INFLUENCE OF MATERIAL-RELATED PARAMETERS ON RC FRAMES RESPONSES, A.B. Shuraim, Civil Engineering Department, King Saud University, Riyadh, Saudi Arabia..... 73

6. SOIL-STRUCTURE AND FLUID-STRUCTURE INTERACTION PROBLEMS

- 6.1 COMPUTATION OF NATURAL FREQUENCIES AND MODE SHAPES OF ARCH DAMS AS AN INVERSE PROBLEM, J. Nasserzare*, Y. Lei# and S. Eskandari*, *Department of Civil Engineering, Technical University of Vienna, Vienna, Austria, #Department of Architecture, Xiamen University, Xiamen, China 81

7. GEOTECHNICAL MODELLING

- 7.1 IMPLEMENTATION OF A KINEMATIC SOIL MODEL INTO AN IMPLICIT DYNAMIC ALGORITHM, P. Woodward* and F. Molenkamp#, *Department of Civil and Offshore Engineering, Heriot-Watt University, Edinburgh, United Kingdom, #Institute of Science and Technology, UMIST, Manchester, United Kingdom..... 89

8. OPTIMIZATION AND SENSITIVITY

- 8.1 OPTIMIZATION OF FRAMES AND TRUSSES UNDER NATURAL FREQUENCY CONSTRAINTS, M.S. Hayalioglu* and M. Ulker#, *Civil Engineering Department, University of Dicle, Diyarbakir, Turkey, #Civil Engineering Department, University of Firat, Elazig, Turkey 95
- 8.2 THE THEOREMS OF STRUCTURAL VARIATION FOR GRILLAGE SYSTEMS, M.P. Saka, Department of Civil Engineering, University of Bahrain, Bahrain..... 101

9. NEURAL NETWORKS AND EVOLUTIONARY DESIGN

- 9.1 A NEURAL NETWORK MODEL FOR PREDICTING COST-FLOW FOR WATER INDUSTRY PROJECTS, A.H. Boussabaine, R. Thoms and T.M.S. Elhag, School of Architecture and Building Engineering, The University of Liverpool, Liverpool, United Kingdom 113
- 9.2 STRUCTURAL DESIGN USING MULTI-LEVEL EVOLUTIONARY STRATEGIES, H.D. Vekeria and I.C. Parmee, Plymouth Engineering Design Centre, University of Plymouth, Plymouth, United Kingdom..... 121
- 9.3 NEURAL NETWORKS FOR HYDRAULIC ANALYSIS OF WATER DISTRIBUTIONS SYSTEMS, C. Xu*, F. Bouchart# and I. Goulter*, *Department of Civil Engineering and Building, Central Queensland University, Rockhampton, Australia, #Department of Civil and Offshore Engineering, Heriot-Watt University, Edinburgh, United Kingdom 129
- 9.4 OPTIMUM SPACING DESIGN OF GRILLAGE SYSTEMS USING GENETIC ALGORITHM, M.P. Saka*, A. Daloglu# and F. Malhas**, *Department of Civil Engineering, University of Bahrain, Bahrain, #Department of Civil Engineering, Blacksen University, Trabzon, Turkey, **Department of Civil Engineering, Bradley University, Peoria, United States of America..... 137

10. PARALLEL AND DISTRIBUTED ANALYSIS AND DESIGN

- 10.1 PARALLEL DESIGN METHODS FOR OPTIMISING LIGHTWEIGHT STRUCTURES, K.L. Chan, D. Kennedy and F.W. Williams, Division of Structural Engineering, University of Wales, Cardiff, United Kingdom..... 149
- 10.2 PARALLEL AND DISTRIBUTED DYNAMIC RELAXATION FORM-FINDING, P. Ivanyi and B.H.V. Topping, Department of Mechanical and Chemical Engineering, Heriot-Watt University, Edinburgh, United Kingdom .. 157
- 10.3 PARALLEL ADAPTIVE MESH GENERATION AND GEOMETRIC MODELLING USING NURBS, B. Cheng and B.H.V. Topping, Department of Mechanical and Chemical Engineering, Heriot-Watt University, Edinburgh, United Kingdom..... 167

❖PREFACE❖

This volume contains a selection of papers presented at The Mouchel Centenary Conference on Innovation in Civil and Structural Engineering, held in Cambridge, England, 19th-21st August 1997.

In 1897 Hennebique granted a licence to Louis Gustave Mouchel, a prominent business man, to introduce his system of ferro-concrete into the United Kingdom. Mouchel established a design office in Briton Ferry, South Wales but moved to London in 1899. Having been responsible for the first reinforced concrete structure in this country in 1897, Mouchel went on to develop many innovations in the use of ferro-concrete. Between 1897 and 1910 over 600 works were completed including: a grain silo at Waterford, Ireland (1903); a jetty near Naples, Italy (1905); and a naval dockyard in Tokyo, Japan (1909).

Louis Gustave Mouchel died in 1908 but the present company, Mouchel Consulting Ltd, has grown out of the partnership he established. In the intervening years Mouchel has been involved in many famous projects and industry 'firsts', including early reinforced concrete ships and Britain's first prestressed concrete bridge, at Boston, Lincolnshire. This conference celebrated the centenary of the Mouchel company under the appropriate banner of Innovation in Civil and Structural Engineering.

The papers in this volume include the following topics: finite element techniques and studies; analysis of plates; computational techniques; non-linear analysis; material modelling; soil-structure interaction problems; geotechnical modelling; optimization sensitivity; neural networks and evolutionary design; parallel and distributed computing for analysis and design. Other papers from the conference are published in:

- Innovation in Composite Materials and Structures
Civil-Comp Press, 1997, ISBN 0-948749-48-2
- Innovation in Engineering for Seismic Regions
Civil-Comp Press, 1997, ISBN 0-948749-49-0
- Innovation in Civil and Structural Engineering
Civil-Comp Press, 1997, ISBN 0-948749-50-4
- Innovation in Civil and Construction Engineering
Civil-Comp Press, 1997, ISBN 0-948749-51-2

We should like to thank all the authors for their contributions and in particular those who presented their papers in Cambridge. We must also thank the members of the Conference Editorial Board, listed on the following page, who helped in many ways before and during the conference. In 1995, Dr V. Peshkam of Mouchel Consulting Ltd proposed the celebration of the Mouchel Centenary by the holding of an international conference on civil and structural engineering. We are grateful to him for the impetus he gave us. The conference would not have been possible without the continued support and encouragement provided by Colin Coulson, Chairman of Mouchel Consulting Ltd. We are especially grateful for his help in seeing this project through to a conclusion.

Barry H.V. Topping and Michael B. Leeming
August 1997

THE MOUCHEL CENTENARY CONFERENCE EDITORIAL BOARD

B. Addis, UK
Dr. T.J.A. Agar, UK
