CIVIL-COMP 83

CIVIL-COMP 83

PROCEEDINGS OF THE INTERNATIONAL CONFERENCE

ON

CIVIL AND STRUCTURAL ENGINEERING

SOFTWARE AND APPLICATIONS

FOR

MICRO AND MINI COMPUTERS

HELD AT

HEATHROW, LONDON

15TH – 17TH NOVEMBER, 1983

Edited by

B. H. V. TOPPING, M. C. FORDE

AND H. W. WHITTINGTON

ENGINEERING TECHNICS PRESS

First published 1983

CONTENTS

SESSION I - THE USE OF MICROCOMPUTERS IN THE DESIGN OFFICE

*Recent and Future Developments in the Role of Microcomputers in the Design Office 1
D. Taffs, Ove Arup Partnership, Oasys Ltd., CICA.

Cost Benefit of Micro-Computers for the Consulting Engineer 5
L.A. Aguilar, Gifford and Partners, Southampton.

The Use of the Microcomputer in the Consulting Engineers Office: A users and a software developers viewpoint 15
A.G. Antrobus, Brian Clancy Partnership & Microsoft Structural Control Systems, London and Manchester.

Microcomputers and Structural Engineering 23
M.J. Fothergill, Richmond Computer Services Limited, Richmond.

SESSION II - COMPUTER DRAFTING AND GRAPHICS

A Low Cost Drafting System for the Civil Engineer 29
T.ON. Maxwell, Maxicomp Ltd., Loughborough.

SESSION III - OFFSHORE ENGINEERING

Reliability Assessment of Offshore Platforms 36
B.L. Eshpuniyani, Indian Institute of Technology, Kharagpur, and S.C. Ram, Mazagon Docks, Bombay, India.

Analysis of Fire Risk in Offshore Structures 43
N.R. Copsey, P.Tong and L.P. Fokkow, Pell Frischmann Offshore, London.

SESSION IV - EDUCATION

The Application of Computer-Aided Learning in an Overall Self-Learning System 53
D. Brohn, Bristol Polytechnic, Bristol.

SESSION V - GEOTECHNICAL, GROUNDWATER AND HYDROLOGICAL APPLICATIONS

The Analysis of Some Consolidation Problems on a Microcomputer 61
H.R. Thomas, University College, Cardiff.

Interactive Microcomputer Aided Design of Earth Dams 70
B.H.V. Topping, M.C. Forde and C.H. Lee, University of Edinburgh.

Further Development of a Geotechnics Package for Micro-Computers 82
L.A. Wood, Queen Mary College, London.

The Multiple Cell Method for the Simulation of Ground Water Flow 89
I.M. Goodwill, University of Leeds.

Experience in the Use of Microcomputers for Rainfall Estimation and Drainage Design 98
R.M. Ashley and C. Jefferies, Dundee College of Technology, Dundee.

SESSION VI - STRUCTURAL ANALYSIS AND DESIGN

The Elasto-Plastic Design of Steel Portal Frames Using a Micro-computer 110
I.W. Burgess and R.J. Plank, University of Sheffield.

The Use of Optimization Algorithms for Practical Microcomputer Aided Design 119
D.J. Robinson and B.H.V. Topping, University of Edinburgh

Interactive Design of Medium Rise Framed Structures 129
K.A. Andam, University of Science and Technology, Kumasi, Ghana.

Microcomputer Aided Design of Masonry Structures 139
S.R. Davies, University of Edinburgh, M. Barrie, Software Sciences Ltd., Farnborough.

Use of a Micro-Computer for Investigations into Design Methods for Reinforced Concrete Portal Frames 146
K.G. Smith, North East London Polytechnic, London.

Applications of Microcomputers to Job-Site Problems in Construction Safety 156
G.T. Halvorsen, T.J. Parsons, West Virginia University & National Institute for Occupational Safety and Health, Morgantown, West Virginia, U.S.A.

An Interactive Program to Design Plywood Web Box Beams or I Beams 166
F.R. Montgomery and R.K.H. Tam, The Queen's University, Belfast.

SESSION VII - CIVIL ENGINEERING MANAGEMENT AND COST CONTROL

*Present and Future Uses of Microcomputers in Construction Management 177
P.K. Barton, Sheffield City Polytechnic.

Is Camp for You? 187
J.C. McIlwrath, J. Crawley, Department of Civil Engineering, Queens University of Belfast and M.I. Reid Kirk, McClure and Morton - Consulting Engineers.

Structuring Project Information to Improve Cost Control on Civil Engineering Projects Using Micro Computers 198
T. Pitt and T. Humphrey, Wrightson Associates, Bristol.

Microcomputers on the Construction Site 204
P.K. Barton, Sheffield City Polytechnic.

Project Financial-Economic Feasibility Analysis: Main-Frame vs. Micro Programming and Use 210
L.H. Klotz, University of New Hampshire, U.S.A.

A Heuristic Method for Time Cost Trade Off in Precedence Networks 220
M.M. Cusack and D. Richardson, Bristol Polytechnic.

SESSION VIII - BILLS OF QUANTITIES, MEASUREMENT AND SURVEYING

An Integrated Survey and Design Program 230
J.C. McIlwrath and P.A. Murray, The Queen's University, Belfast.

The Application of Micro-Computers to Cross-Country Pipeline Work (1) 238
D.J. Gedge, South West Water, Exeter.

The Application of Micro-Computers to Cross-Country Pipeline Work (2) 252
R.J.Flew, South West Gas, Bristol.

The Growth of Moss 255
S. Heatherington, Moss Systems Ltd., Bognor Regis.

Computer Aided Taking Off 267
R. Wilding, John Laing Construction Ltd., Hemel Hempstead.

Cab Sir? 274
J.J. Gibson, J.C.McIlwrath, The Queen's University of Belfast and M.I.Reid, W.R.H. Barton, Kirk McClure and Morton - Consulting Engineers.

SESSION IX - REAL TIME APPLICATIONS - DATA ACQUISITION AND PROCESSING

*No Man is an iland, Intire of it selfe 283
R.H.B. Winder, Cementation Research Ltd., and Brunel University.

Microcomputer-Based Technique for Non-Destructuve Testing of Rock Anchors 288
H.W. Whittington and M.C. Forde, Civiltronics Ltd., Galashiels.

A Modern Data Collection System and its Interfacing Requirements 297
R.H. Scott, P.A.T. Gill and M. Munro, University of Durham.

A Contactless Rutmeter for Road Maintenance Purposes 308
H.J.H. Baillie, J. Mallon, D. McGlade and L.M. McCullough, Department of the Environment for Northern Ireland and The Queen's University, Belfast.

Data Collection and Analysis in Building Engineering 317
R.T. Lewis, University of Bath.

Computer Controlled Experiments Aboard a Large Centrifuge 330
W.H. Craig, Simon Engineering Laboratories, University of Manchester.

The Use of Microcircuits in a Computer Controlled System for the Measurement of the Electrical Resistivity of Concrete 336
J.G. Wilson, Napier College, Edinburgh, H.W. Whittington and M.C. Forde, University of Edinburgh.

* *indicates review paper*
