Chapter 3

- Table 3.2 is redrawn from *A. Sextos, A. Kappos, "Seismic response of bridges under asynchronous excitation and comparison with EC8 design rules", Bulletin of Earthquake Engineering Engineering, 7, 519-545, 2008*, with kind permission of Springer Science and Business Media.
- Figure 3.4 is reproduced from *A. Sextos, A. Kappos, "Seismic response of bridges under asynchronous excitation and comparison with EC8 design rules", Bulletin of Earthquake Engineering Engineering, 7, 519-545, 2008*, with kind permission of Springer Science and Business Media.
- Figure 3.5 is reproduced from *A. Sextos, A. Kappos, K. Pitilakis, "Effect of analysis complexity on the calculated ductility demand of RC bridges", 12th European Conference on Earthquake Engineering, London, U.K., 7-13 September, paper 653, 2002*.

Chapter 8

All flowcharts were redrawn re-engineered based on algorithms from their respective cited sources.

Chapter 11

- Figure 11.1(a) is repoduced from the EERI and IAEE, "World Housing Encyclopedia: Report No. 13: Housing Report for Cyprus", `http://www.world-housing.net/` with permission.
- Figure 11.1(b) is repoduced from the Greek language Wikipedia article on "Condominium", `http://el.wikipedia.org/wiki/`Πολυκατοικία
- Figures 11.2(a), 11.2(b), 11.2(c) and 11.2(d) were taken by C. Zeris and are reproduced courtesy of the National Information Service for Earthquake Engineering, EERC, University of California, Berkeley.
- Figure 11.2(f) is reproduced from *M. Free, T. Rosetto, N. Peiris, F. Taucer, B. Zhao, R. Koo, J. Wang, X. Ma, E. Verucci, "The Wenchuan, China earthquake of 12 May 2008", A field report by EEFIT, Institution of Structural Engineers,*

U.K., 2008, with kind permission of EEFIT.

- Figure 11.2(g) is reproduced from *D. D'Ayala, M. Free, (Editors), R. Bilham, P. Doyle, R. Evans, P. Greening, R. May, A. Stewart, B. Teymur, D. Vince, "The Kocaeli, Turkey earthquake of 17 August 1999", A field report by EEFIT, Institution of Structural Engineers, U.K., 2003*, with kind permission of EEFIT.
- Figure 11.3(a) is reproduced from *R. Hughes, R. Nichols, T. Paul, J. Riding, "The Augusta, Sicily Earthquake of 13 December 1990", A Field Report by EEFIT, Institution of Structural Engineers, U.K., 1990*, with kind permission of EEFIT.
- Figure 11.3(b) is reproduced from *A. Pomonis, A. Coburn, S. Ledbetter, "The Vrancea, Romania earthquakes of 30-31 May 1990", A field report by EEFIT, Institution of Structural Engineers, U.K., 1990*, with kind permission of EEFIT.
- Figure 11.3(c) is reproduced courtesy of the National Information Service for Earthquake Engineering, EERC, University of California, Berkeley, `http://nisee.berkeley.edu/elibrary/Image/S276`
- Figure 11.3(d) is reproduced from *M. Maheri, "The Manjil, Iran earthquake of 20 June 1990", A field report by EEFIT, Institution of Structural Engineers, U.K., 1990*, with kind permission of EEFIT.
- Figures 11.3(e), 11.3(f) and 11.3(g) are reproduced from *T. Rossetto, N. Peiris, J. Alarcon, E. So, S. Sargeant, C. Libberton, E. Verrucci, D. Del Re, M. Free, "The L'Aquila (Italy) Earthquake of 6th April 2009", A field report By EEFIT, Institution of Structural Engineers, U.K., 2009*, with kind permission of EEFIT.
- Figure 11.3(h) was taken by V. Bertero and is reproduced courtesy of the National Information Service for Earthquake Engineering, EERC, University of California, Berkeley, `http://nisee.berkeley.edu/elibrary/Image/GoddenJ84`

Chapter 12

- Figure 12.2(a) and 12.2(c) are repoduced from *Earthquake Engineering Research Institute (EERI), "Loma Prieta Earthquake Reconnaissance Report", Earthquake Spectra, Supplement to Volume 6, EERI, Oakland, California, 1990*, and *Earthquake Engineering Research Institute (EERI), "Northridge Earthquake Reconnaissance Report", 2, Earthquake Spectra, Supplement to Volume 11, EERI, Oakland, California, 1996*, with kind permission of the Earthquake Engineering Research Institute, Oakland, California, USA.
- Figure 12.2(b) is reprinted from *Building Research Institute (BRI), "A Survey Report for Building Damages Due to the 1995 Hyogo-Ken Nanba Earthquake", Ministry of Construction, 1996* by courtesy of the Director, Department of Research Planning and Management, BRI Japan. (Permit of Document No. 54, 9 March 2010).
- Figures 12.9 are reproduced with kind permission of Sota Glazing Inc., `http://www.sotawall.com`
- Figures 12.10(a) are reproduced with kind permission of John DuBois, `www.armory.com/~spcecdt`

- Figure 12.10(b) was taken by Eduardo Fierro and is reproduced with kind permission of the Earthquake Engineering Research Institute, Oakland, California, USA.
- Figures 12.15 were taken by Jian Zhao and are reproduced with kind permission of the Earthquake Engineering Research Institute, Oakland, California, USA.
- Figure 12.21(left) was taken by Eduardo Fierro and is reproduced with kind permission of the Earthquake Engineering Research Institute, Oakland, California, USA.
- Figure 12.21(right) was taken by Fouad Bendimerad and is reproduced with kind permission of the Earthquake Engineering Research Institute, Oakland, California, USA.
