Contents

Preface	vii
1 High Performance Computing - Trends, Opportunities and Challenges	1
M. M. Resch and T. Boenisch	
1.1 Introduction	1
1.2 The end of Moore's law	2
1.2.1 What does it mean for architectures?	3
1.2.2 How do we move forward in HPC architectures?	3
1.3 The opportunities of software and algorithms	4
1.3.1 Programming Models	4
1.3.2 Power Efficiency	4
1.3.3 New Algorithms	5
1.4 The impact of data on HPC	5
1.4.1 What does this mean for HPC?	5
1.4.2 What does this mean for HPC environments and architectures? ..	7
1.5 Conclusion	7
2 A Multi-GPU Framework for Structural Optimization under Uncertainty	9
D. Herrero-Pérez and J. Martínez-Frutos	
2.1 Introduction	10
2.2 Distributed GPU architectures	11
2.3 Structural Optimization Under Uncertainty	13
2.4 Distributed GPU framework for structural optimization under uncer- tainty	16
2.5 Numerical experiments	20
2.6 Conclusion	24
3 Massively Parallel Evolutionary Structural Optimization for High Reso- lution Architecture Design	29
J. Martínez-Frutos and D. Herrero-Pérez	
3.1 Introduction	30

3.2	GPU and CUDA architecture	33
3.3	Evolutionary Structural Optimization using Isosurfaces.....	34
3.4	GPU implementation	36
3.4.1	Fine-grained Vcycle preconditioner	36
3.4.2	Dof-by-Dof Matrix Vector product	39
3.4.3	Node-by-Node stress calculation	41
3.4.4	Efficient computation of enclosed volume from isosurface using Marching Cubes	41
3.5	Numerical example: Tree-inspired branching supports.	43
3.6	Conclusion and Future Work	45
3.7	Acknowledgements	46
4	Finite Element Integration and Assembly on Modern Multi and Many- core Processors	51
	K. Banaś, F. Kružel, J. Bielanski and K. Chłoń	
4.1	Introduction	51
4.2	Problem statement	53
4.2.1	Weak formulation	53
4.2.2	Finite element calculations.....	55
4.2.2.1	Transformation to the system of linear equations	55
4.2.2.2	Numerical integration.....	56
4.2.2.3	Global assembly	57
4.2.2.4	The flow of calculations	58
4.2.2.5	A generic algorithm for the creation of the global system of linear equations	58
4.3	Programming model	60
4.3.1	Hardware platforms	62
4.4	Implementation and optimization of the creation of systems of linear equations	64
4.4.1	General considerations	64
4.4.2	Parallelization of numerical integration	66
4.4.2.1	One-lement-one-thread strategy	66
4.4.2.2	One-element-several-threads strategy	69
4.4.2.3	One-element-two-kernels strategy	70
4.4.3	Optimization	71
4.5	Computational experiments	72
4.5.1	First order approximation	72
4.5.2	Higher order approximation	73
4.6	Conclusion	74
5	Code Coupling At Scale: Towards The Digital Product	79
	S. M. Longshaw, A. Skillen, C. Moulinec and D. R. Emerson	

5.1	Introduction	79
5.2	Universal Scientific Code Coupling	83
5.2.1	Coupled High Performance Computing Applications	85
5.2.2	Coupling Approaches	87
5.2.3	Existing Coupling Software.....	88
5.2.3.1	Coupling Frameworks	88
5.2.3.2	Coupling Interfaces	90
5.3	Case Studies.....	95
5.3.1	Nuclear Reactor Hot Box Dome	95
5.3.2	Multi-scale Simulation of Nanofluidic Networks	96
5.3.3	Particle Coupling: Couette Flow.....	100
5.4	Conclusions	102
5.5	Acknowledgements	104
6	Simulation and Visualization of Discrete Particles on Clusters, Grids and Clouds	109
	A. Kačeniauskas and R. Pacevič	
6.1	Introduction	110
6.2	The related works	112
6.2.1	Parallel discrete element computations	112
6.2.2	Visualization of discrete particle systems	114
6.3	The governing relations of the DEM.....	116
6.4	Parallel DEM algorithms	117
6.5	Visualization techniques for propagating cracks	121
6.5.1	The cell cut-based visualization technique	122
6.5.2	The Voronoi-based visualization technique	123
6.5.3	The cell centre-based visualization technique.....	124
6.6	Results.....	125
6.6.1	Parallel speed-up of DEM computations	125
6.6.2	Performance analysis of crack visualization	126
6.7	Conclusions	129
7	Flowbster Workflow System for Clouds	137
	P. Kacsuk, J. Kovács and Z. Farkas	
7.1	Introduction to Flowbster.....	137
7.2	Concept and Overview	139
7.3	Flowbster Workflow System Layer	142
7.3.1	Structure	142
7.3.2	Configuration	143
7.3.3	Feeding, gathering data items	144
7.3.4	Parameter sweep support.....	145

7.3.5	Static scalability	146
7.4	Flowbster application layers	147
7.4.1	Flowbster Application Description Layer	148
7.4.1.1	Single-node workflow	148
7.4.1.2	Multi-node workflow	148
7.4.2	Flowbster Workflow Design Layer	151
7.5	Conclusions and further development	153
8	Parallel Semi-Aggregation Techniques for Solving Parabolic Partial Differential Equations	157
	G. A. Gravvanis, B. E. Moutafis, C. K. Filelis-Papadopoulos and H. G. Theodosiou	
8.1	Introduction	158
8.2	Semi-aggregation techniques for time-space discretization	160
8.3	Parallelization of semi-aggregation type methods for the solution of parabolic PDEs	164
8.4	Heat transfer model problems	166
8.4.1	Thin composite plate cooling	166
8.4.2	Heat transfer in three space variables	170
8.5	Numerical Results	172
8.6	Conclusion	179
9	Two-scale Model of Masonry Structures and its Implementation on Parallel Computers	183
	J. Kruis and T. Krejci	
9.1	Introduction	183
9.2	Coupled heat and moisture transport	185
9.3	Two-scale approach	186
9.3.1	Heat balance equation	188
9.3.2	Mass balance equation	191
9.3.3	Solution of multi-scale problem	192
9.3.4	Integration in time	193
9.4	Parallelisation	195
9.5	Numerical examples	199
9.5.1	Two-dimensional brick analysis	199
9.5.2	Three-dimensional bridge analysis	199
9.6	Conclusion	200
10	From Synchronous to Asynchronous Substructuring Methods	203
	F. Magoulès	
10.1	Introduction	203

10.2 Synchronous iterative methods.....	204
10.3 Asynchronous iterative methods	206
10.3.1 Asynchronous iteration.....	206
10.3.2 Mathematical model.....	208
10.3.3 Convergence analysis	208
10.4 Asynchronous sub-structuring methods	210
10.5 Numerical experiments	211
10.6 Conclusion	212

Preface

This volume comprises the Invited Lectures presented at *The Fifth International Conference on Parallel, Distributed, Grid and Cloud Computing for Engineering* held in the Faculty of Engineering and Information Technology at the University of Pécs, Hungary from 30-31 May 2017.

The contributed papers from the conference are published in: Proceedings of the Fifth International Conference on Parallel, Distributed, Grid and Cloud Computing for Engineering, P. Iványi, B.H.V. Topping and G. Várady, (Editors), Civil-Comp Press, Stirlingshire, Scotland, 2017.

We would like to thank the members of the Editorial Board of *The Fifth International Conference on Parallel, Distributed, Grid and Cloud Computing for Engineering*: Prof. H. Adeli (United States of America), Prof. R. Agarwal (United States of America), Dr. H. Akiba (Japan), Prof. E. Aulisa (United States of America), Dr. L. Badea (Romania), Prof. B. Balachandran (United States of America), Dr. K. Banas (Poland), Prof. J. Baugh (USA), Prof. M. L. Bittencourt (Brasil), Prof. H. Borouchaki (France), Dr. J. Brozovsky (Czech Republic), Prof. X. Cai (Norway), Dr. T. akar (Turkey), Prof. L. S. Castro (Portugal), Dr. A. Chan (Australia), Dr. P. Coelho (Portugal), Dr. O. Coulaud (France), Prof. R. Couturier (France), Dr. M. Damodaran (Singapore), Dr. R. Deiterding (United Kingdom), Prof. B. Dennis (United States of America), Prof. P. Devloo (Brazil), Dr. M. Dolenc (Slovenia), Prof. D. Eyheramendy (France), Dr. V. Galiano (Spain), Dr. M. Ganzha (Poland), Dr. J. J. R. García (Spain), Prof. G. A. Gravvanis (Greece), Dr. B. Glut (Poland), Dr S. W. Gong (Singapore), Dr. D. Herrero-Pérez (Spain), Dr. J-W Hong (Korea), Dr. D. Horák (Czech Republic), Dr. F. Hulsemann (France), Prof. I. R. Ionescu (France), Prof. B. A. Izzuddin (United Kingdom), Dr. C. Janna (Italy), Prof. B. Jeremic (United States of America), Prof. P. Jimack (United Kingdom), Prof. M. B. Juric (Slovenia), Prof. P. Kacsuk (Hungary), Prof. Dr. A. Kačeniauskas (Lithuania), Dr. A. I. Khan (Australia), Dr. R. Klinc (Slovenia), Prof. W. Knottenbelt (United Kingdom), Dr. G. Kosec (Slovenia), Prof. T. Kozubek (Czech Republic), Prof. M. Krafczyk (Germany), Prof. J. Krus (Czech Republic), Dr. O. Kurc (Turkey), Dr. A. Kuzelewski (Poland), Prof. P. Ladeveze (France), Dr. M. Leps (Czech Republic), Dr. R. I. Mackie (United Kingdom), T. Máray (Hungary), Dr. J. Martínez-Frutos (Spain), Dr. C. Mateos (Argentina), Prof. G. Meschke (Germany), Prof. P. Michailidis (Greece), Dr. H. Migallón (Spain), Prof. V. Migallón (Spain), Prof. D. Milasinovic (Serbia), Prof. G. F. Moita (Brasil), Prof. K. Morgan (United Kingdom), Dr. C. Moulinec (United Kingdom), Dr. N. Muhtaroglu (Turkey), Prof. G. Nikishkov (United States of America), Dr. I. K. Niko-

los (Greece), Prof. P. Pagliosa (Brazil), Prof. J. Batista de Paiva (Brazil), Prof. M. Paprzycki (Poland), Dr. E. Patelli (United Kingdom), Prof. T. Rabczuk (Germany), Dr. A. R. M. Rao (India), Prof. J. M. Reese (United Kingdom), Prof. M. Resch (Germany), Prof. M. L. Romero (Spain), Prof. M. Schafer (Germany), Dr. A. Shterenlikht (United Kingdom), Prof. V. Sonzogni (Argentina), Dr. I. Spence (United Kingdom), Prof. P. Spiteri (France), Dr. S. Sugimoto (Japan), Dr. V. Stankovski (Slovenia), Dr. G. Sutmann (Germany), Prof. J.C.F. Telles (Brasil), Prof. V. Toropov (United Kingdom), Dr. R. Trobec (Slovenia), Prof. D. Tromeur-Dervout (France), Prof. J. M. G. Vida (Spain), Prof. B. Vinter (Denmark), Dr. C. Walshaw (United Kingdom), Dr. T. Yamada (Japan) and Dr. J. Zeman (Czech Republic).

Professor P. Iványi
Faculty of Engineering and
Information Technology
University of Pécs, Hungary

Professor B.H.V. Topping
University of Pécs, Hungary &
Heriot-Watt University, Edinburgh, U.K.

Dr G. Várady
Faculty of Engineering and
Information Technology
University of Pécs, Hungary
